Flexible Design to Suit Your Needs.

Thanks to its flexible design the ShieldGLAND can be used with armoured, SY, CY and non-armoured cables.

The ShieldGLAND's versatile clamping olive can simply be switched to take either armoured or SY, CY making installation quick and easy.

The Insert

The ShieldGLAND's **unique adaptable insert** allows a wider range of cable acceptance due to its two part sealing gasket. Simply leave as is or remove inner sealing insert depending on your cable requirement.

Why is the ShieldGLAND better?

The ShieldGLAND replaces the use of the conventional BW/CW gland for cable termination.

Firstly, the ShieldGLAND offers superior protection, IP68 to be exact which ensures protection against dust, dirt and water.

Furthermore, the ShieldGLAND's plastic outer body eliminates the need for a shroud helping to save time and improve ease of installation.

Finally, the finished look creates a much cleaner final installation. The ShieldGLAND has also been designed to work with our iconic COMBI junction box series and accessories.
